WATERBORNE ANTI-RUST PRIMER

Waterborne anti-rust primer for metallic surfaces

Page 1 de 2

Waterborne anti-rust De la Peña primer is formulated as a combination of acrylic copolymer emulsions of the highest quality. This grants it excellent properties of adherence, flexibility, resistance to abrasion and to weather. This primer may be used as a sealer prior to finishing with all kinds of enamels (acrylic, alkyd, etc.), both water and solvent-based.

Due to its high percentage of emulsion and anticorrosion pigments, it is suitable both as a primer and as a finishing coat.

Features

Color	Rust red and others available with minimum order quantity
Finish	Semi-matt
Specific weight	1,30 g/cm ³
Viscosity at time of packaging	95 KU at 25° C
Coverage	8 to 10 m ² /kg per coat (depending on the surface)
Dry-to-touch time	15 minutes / 20° C approximately
Curing time	21 days
Recoat	1 hour
Thin with	Clean water
Presentation	1 kg / 4.5 kg / 20 kg cans
Storage temperature	Keep away from extreme temperatures

Application

This product can be used for indoor and outdoor use. It can be applied to ferrous metal surfaces, cement, plaster, concrete, brick, stonework, etc., by brush, roller or spray. Surfaces to be painted must be clean, dry, and free of dirt, dust, grease, oil, rust, soap, wax, scaling paint, water soluble materials, and mildew. Do not apply when air and surface temperatures are below 5° C or above 35° C.

Product formulation

Clean water, acrylic emulsion, anticorrosion pigments, ground calcium carbonates and other fillers.

For domestic use only. Keep out of reach of children.

Cautions

Aquatic Chronic 2: H411 - Toxic to aquatic life with long lasting effects.
