PEÑASOL

PROTECTIVE WOODSTAIN AND MULTIPURPOSE DECORATOR

Page 1 de 2

Product manufactured with very fine particle special acrylic resins for the protection of wood against the sun and the moisture. The wood stain, unlike a varnish, **penetrates** deeply into the wood, open pore. Since it does not form layers, it allows the wood **to breathe** and always keep the balance between the wood's own moisture and the environment that surrounds it. In this way it protects and beautifies wood with **maximum respect to the natural appearance of its grain**.

It is colorless or transparent, flexible and hard, with great adherence, easy to apply and very low odor. Its composition contains specific fungicides that protect the wood from the blueness and other diseases caused by fungi.

It can also be used as a fixative and waterproofing for general use of plaster, cement, plaster, lime, brick, stone, etc. without that material where they apply just suffer alterations in color. It protects the saltpeter from moisture and other impurities. It can be dyed with Pinturas de la Peña's universal dye.
